

I am a subscriber and support XM Satellite Radio's right to provide an alternative to AM and FM radio stations. There is no difference between providing music or news stations and providing traffic or weather stations. I am paying for the service of XM Satellite Radio providing me with information. It shouldn't be up to the National Association of Broadcasters to decide which information XM is allowed to provide me.  
Respectfully yours,

Susan E. Harris  
Boca Raton, FL
